

# PLANNING TO SERVE YOU BETTER

The Village Public Works Department (PWD) is starting a resiliency planning project paid for with a Municipal Planning Grant (MPG) from the Department of Housing and Community Development (DHCD). This effort is aimed at reducing service interruptions and improving service to customers on the oldest segments of the system.

Aldrich and Elliot Engineers were selected to evaluate vulnerabilities in the water and sewer service lines and create a prioritized list of deficiencies with estimates for budgeting and grant application purposes.

This work is part of a shift toward adopting a proactive approach to system needs, versus a reactive response to system failures.
